EXPERIENCE

Microsoft - Seattle, WA Sep 2024 – Present
Software Engineer

- Led migration of a Microsoft Defender for Endpoint service processing approximately 3.5 billion protection samples daily, deploying it in a new region and completing the production cutover with zero service errors.
- Reduced p50 service latency by 26% and p90 latency by 7% after the migration.
- Modernizing Defender services for Microsoft Cobalt/ARM and migrating them to Kubernetes to improve hardware portability, scalability, and deployment consistency.
- Cut build times by 50%+ and lowered portfolio costs by optimizing build pipelines and developer tooling.

Amazon Web Services - Seattle, WA Jun 2022 – May 2023
Software Development Engineer

- Built diagnostic tooling for Amazon Aurora MySQL clusters that accelerated root-cause analysis of production incidents and reduced customer downtime.
- Automated operational workflows in Python, Bash, and SQL across multiple teams, reducing mean time to resolution by 80%+.

ADP - Roseland, NJ Jun 2021 – Aug 2021
Software Engineer Intern

- Built a Java user-management platform with Struts and Hibernate for the Data Exchange team, supporting onboarding for 1,000+ customers and improving developer workflows.

PROJECTS

Couch Kit

Open-source TypeScript framework for local multiplayer games; coordinates TV and mobile clients over WiFi and WebSockets and ships as a suite of npm packages.
TypeScript, React Native, WebSockets, npm

Faros

Full-stack geospatial app with a Go REST API, Turso database, and React client, deployed on Azure.
Go, SQL, REST API, Azure, Turso

SKILLS

Languages:
Java, Python, C++, SQL, Go, C#, TypeScript, Bash, Rust

Backend/Infrastructure:
Distributed Systems, Kubernetes, Docker, REST APIs, WebSockets, CI/CD, GitHub Actions, Azure DevOps

Cloud/Databases:
AWS, Azure, Amazon Aurora MySQL, MySQL, PostgreSQL, Turso

EDUCATION

New Jersey Institute of Technology - Newark, NJ May 2022
B.S. in Computer Science
